core

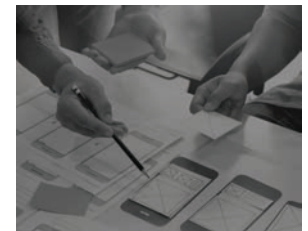

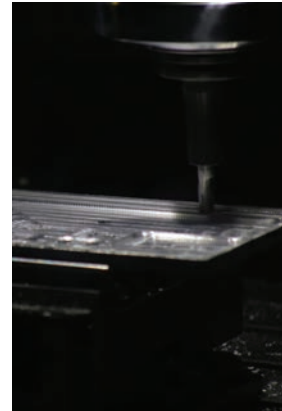

Welcome to Core!

We offer exclusive smart home experience for your living spaces with unique products and features based on design and technology.

Who we are?

We are group of engineers and designers who are specialised to create innovative design products for exclusive living spaces.

Our Values

International Standards

We believe that interoperability and integration are key values at future smart home and building technologies. That's why, we are committed to mainstream international standards such as KNX, Modbus and Z-Wave while creating new products

IoT and Integration

We are passionate about limitless possibilities of IoT World. We are working so hard to integrate mainstream building and smart home technologies with power of IoT World. Future is fullfilled with lot and our products will be essential bridges between mainstream building Technologies and IoT devices.

Cloud Technologies

We believe that privacy of your data and safety of your house must be fundamental basics of smart home and building Technologies. So we use latest cloud Technologies to provide your data safe in internet World.

Design

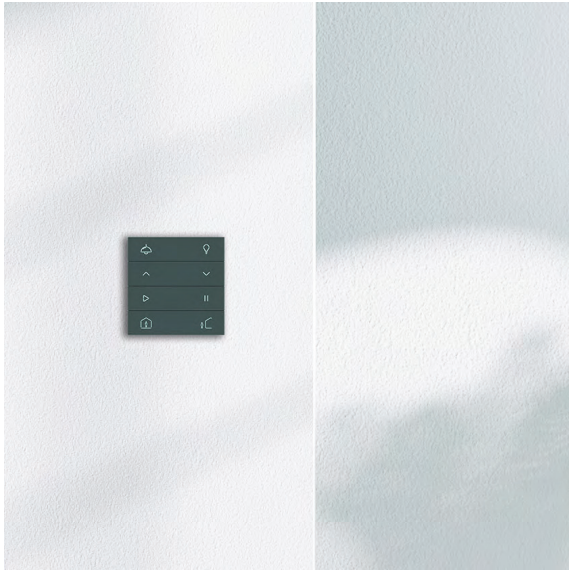

We believe the power of simplicity in design and work so hard to create simple, beautiful and intuitive products for your smart home. You can see the perfection of details and uniqueness of design both in all devices.

INTUITIVE
USER EXPERIENCE

PREMIUM
MATERIALS

ECLIPSE
DESIGN LINE

Control all devices in room

Eclipse room controller is designed to be the most exclusive touch panel for rooms. High quality display combined with premium materials in the same design language of other Core products with only 11mm thickness on the wall. Intuitive user interface provides seamless control experience to match with all at last. The result is more than a satisfaction...

FOLD OPTIONS

PREMIUM
MATERIALS

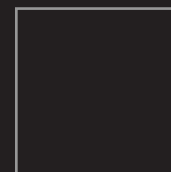

PUSH-BUTTON
SWITCH

Eclipse

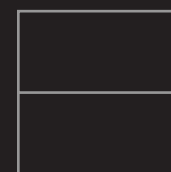

Push-Button Switch

Stylish and Radiant

Eclipse Switch is designed to control the ambient in a stylish way, thanks to premium materials and finishes. It is also equipped with multiple sensors to automate the ambient; thus becomes a switch, a sensor and a design material.

1 Fold

2 Fold

4 Fold

1 Fold
Brushed Aluminum Black

More than just a **Switch**

Eclipse Switch can activate many functions like other smart switches does such as switching and dimming. Besides these, it can do much more with its built-in logic functions and multiple sensors.

BUILT-IN THERMOSTAT

Eclipse Switch can control HVAC systems via built-in thermostat logic, temperature sensor and humidity sensor.

AIR QUALITY MEASUREMENT

Eclipse Switch measures CO2 inside the room with its built-in sensor and determine air-quality of the room. According to the air-quality level of the room, logic functions can be triggered via KNX systems.

Customizable **Backlit Icons**

ICONS CUSTOMIZATION

Icon or text can be engraved to each buttons in folds. Thanks to dedicated online planner, customer can select icons from extensive icon library or write text accordingly.

RGB BACKLIGHTS

RGB Backlights of the icons indicate the status of connected load. Color of the backlight can be configured via ETS programming tool.

ADAPTIVE BACKLIGHTS

Light sensor measures ambient light and icon backlights are dimmed according to the light level in the room.

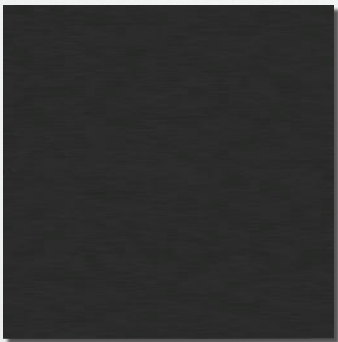

PROXIMITY SENSOR

Proximity sensor senses the approach and backlights of icons are dimmed up to welcome customer in the dark ambients.

Eclipse Room

Temperature Controller

Multi-functional and Intuitive

Most of the multi-functional thermostats offer very complicated user experience. Eclipse thermostat is designed to be super easy to control but at the same time functional to control most of the heating&cooling systems.

core

Intuitive Control of Temperature

SUPER KNOB

All functions including temperature change is controlled via single Knob. Just rotate Knob to change room temperature, or press and rotate to select which function to change.

CONFIGURABLE FUNCTIONS

Eclipse Thermostat has several functions like temperature change, operation mode, operating mode, fan control and also AC vane control. Functions are configured via ETS and only functions that configured are displayed in the screen.

CUSTOMIZABLE BUTTONS

There are 2 backlit icon buttons which can be configured to control any function in the room such as switching or dimming; or can be configured to control thermostat functions.

Built-in VRV Controller

Eclipse Thermostat controls VRV Systems indoor units via its built-in modules. This provides flexibility in the infrastructure and also saving cost

Eclipse Touch Panel

Pure Elegance for KNX Home Controllers

10"

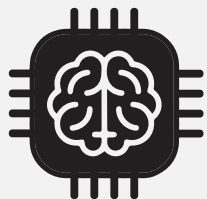

7"

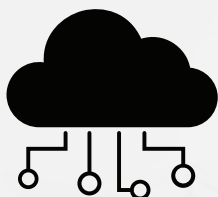

With its elegant design, Eclipse is designed to be a real gateway to the world of IoT, as the server of all smart devices in your home

You can easily control your home from the screen or from your phone.

Server of Knx Smart Home

Eclipse Panel has multiple automation interfaces to control and visualize KNX Systems. Thanks to CoreOS 4.0, Eclipse Panel can integrate KNX, Modbus and IoT control elements in a single project without the need of another servers

A True Gateway to IoT World

Eclipse Panel is a true gateway between KNX Systems and IoT world natively without need of additional hardware or software. IFTTT, Amazon Alexa, Google Home and Siri Shortcuts are currently available IoT platforms to integrate IoT devices to KNX Systems over CoreOS operating system.

Intercom Client

Eclipse Panel is perfect intercom indoor panel for SIP Intercom Systems. Using IP Technology and SIP Protocol provides robust communication, high resolution video calls and compatibility with most common intercom door stations.

Remote Controller

Eclipse Panel provides secure and robust connection to Core Mobile App through Cloud Authentication Servers thus providing visualization and control of all systems in Eclipse Panel.

Key Feature

Unlike ordinary touch panels, Eclipse Panel has many features other than viewing and controlling the status of your smart home. In this way, it differs from all touch screens in the market

Eclipse Touch Panel
Stainless Steel

Elegant Design

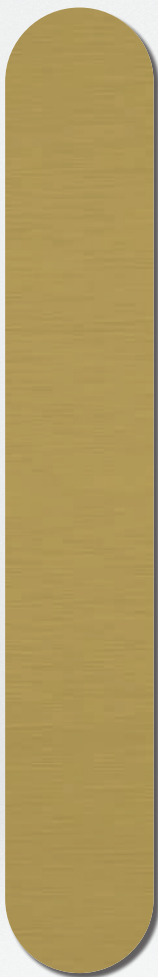

Through the Eyes of the Designer

“When I was imagining Eclipse, I thought it was simple, elegant and powerful. When the designed organic form is on the wall, it feels as if it flies slightly in the air... I think Eclipse evokes the awakening with the house while following the organic forms of nature.”

Hardware Features

Eclipse panel is equipped with powerful hardware components to perform complex smart home task and unique features of CoreOS operating system

Next Generation Processor Set

Android 8.1

Industrial Level Processor

4X Faster

We have selected the next generation processor kit from Rockchip with PX30 Quad Core ARM Cortex-A35@1.3GHZ, 2GB RAM and 8GB EMMC. This processor set is four times faster than our previous generation touchscreens and was designed by Rockchip to work in industrial applications.

Internal Inputs and Outputs

All Touch Panels have integrated 5 digital inputs and 4 outputs. Outputs are provided with 8A Latching Relay (with Memory) thus providing positional memory during touch panel reboot or power failure.

Automation Interfaces

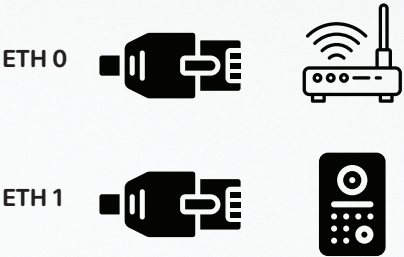

RS-485

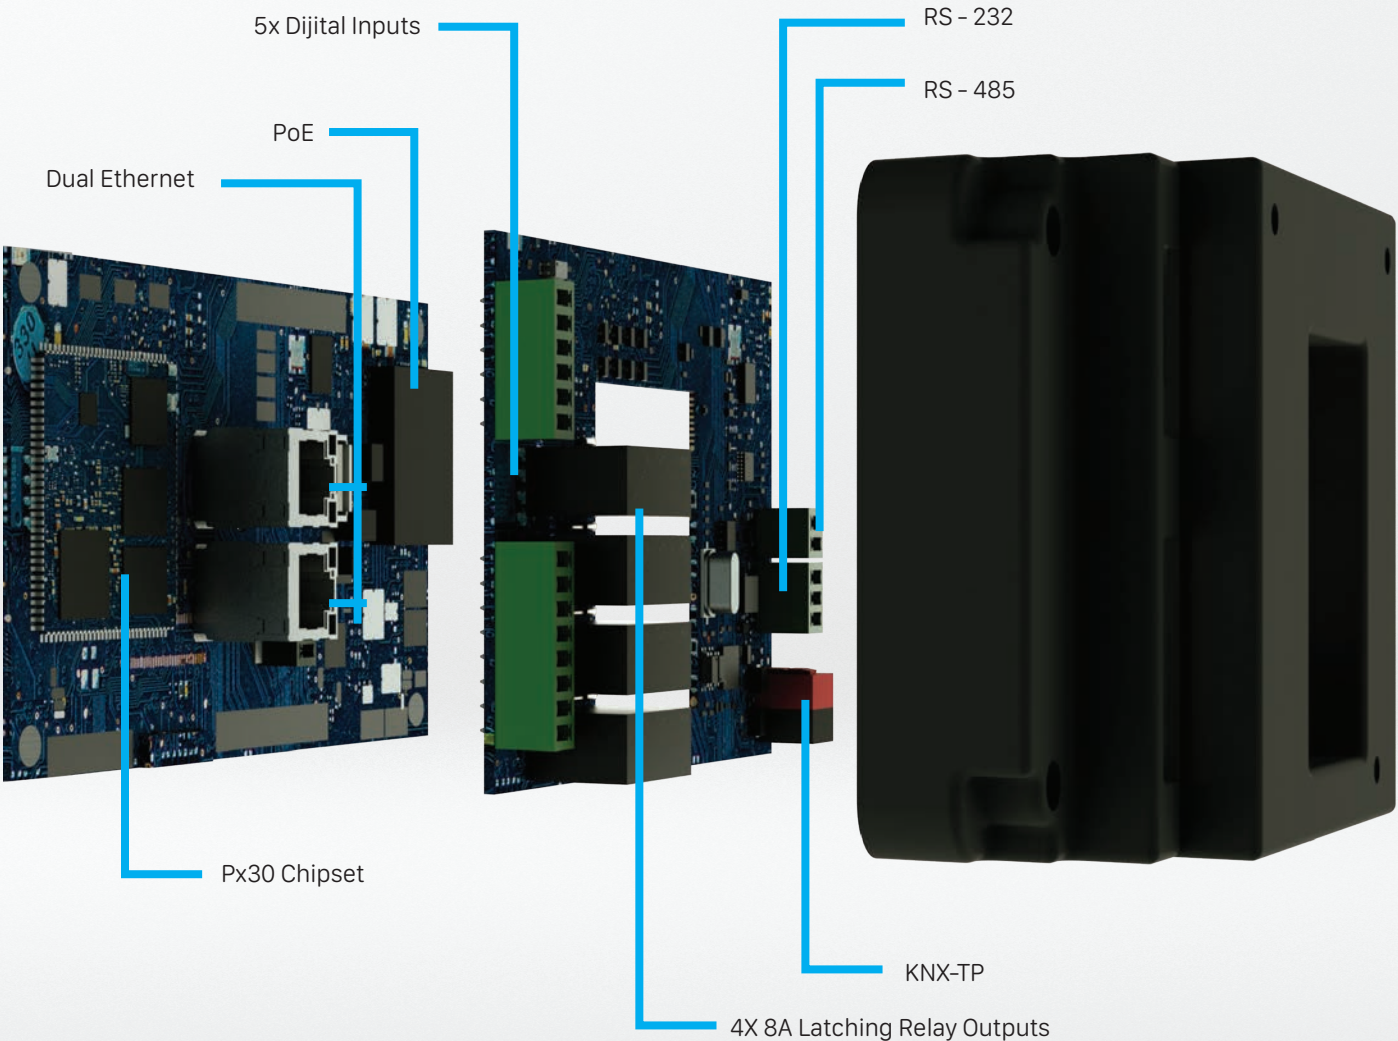

RS-232

Our Touch Panels have the most commonly used automation interfaces internally. this allows devices from different protocols to be used together in the same project. In addition the integrator does not need additional converters or adapters for these interfaces.

Dual Network Connection

The touch screens have 2 ethernet network interfaces that can connect to different IP networks. Especially in large residential projects, the separation of the home network and Intercom network is an important feature for the stable operation of the intercom system.

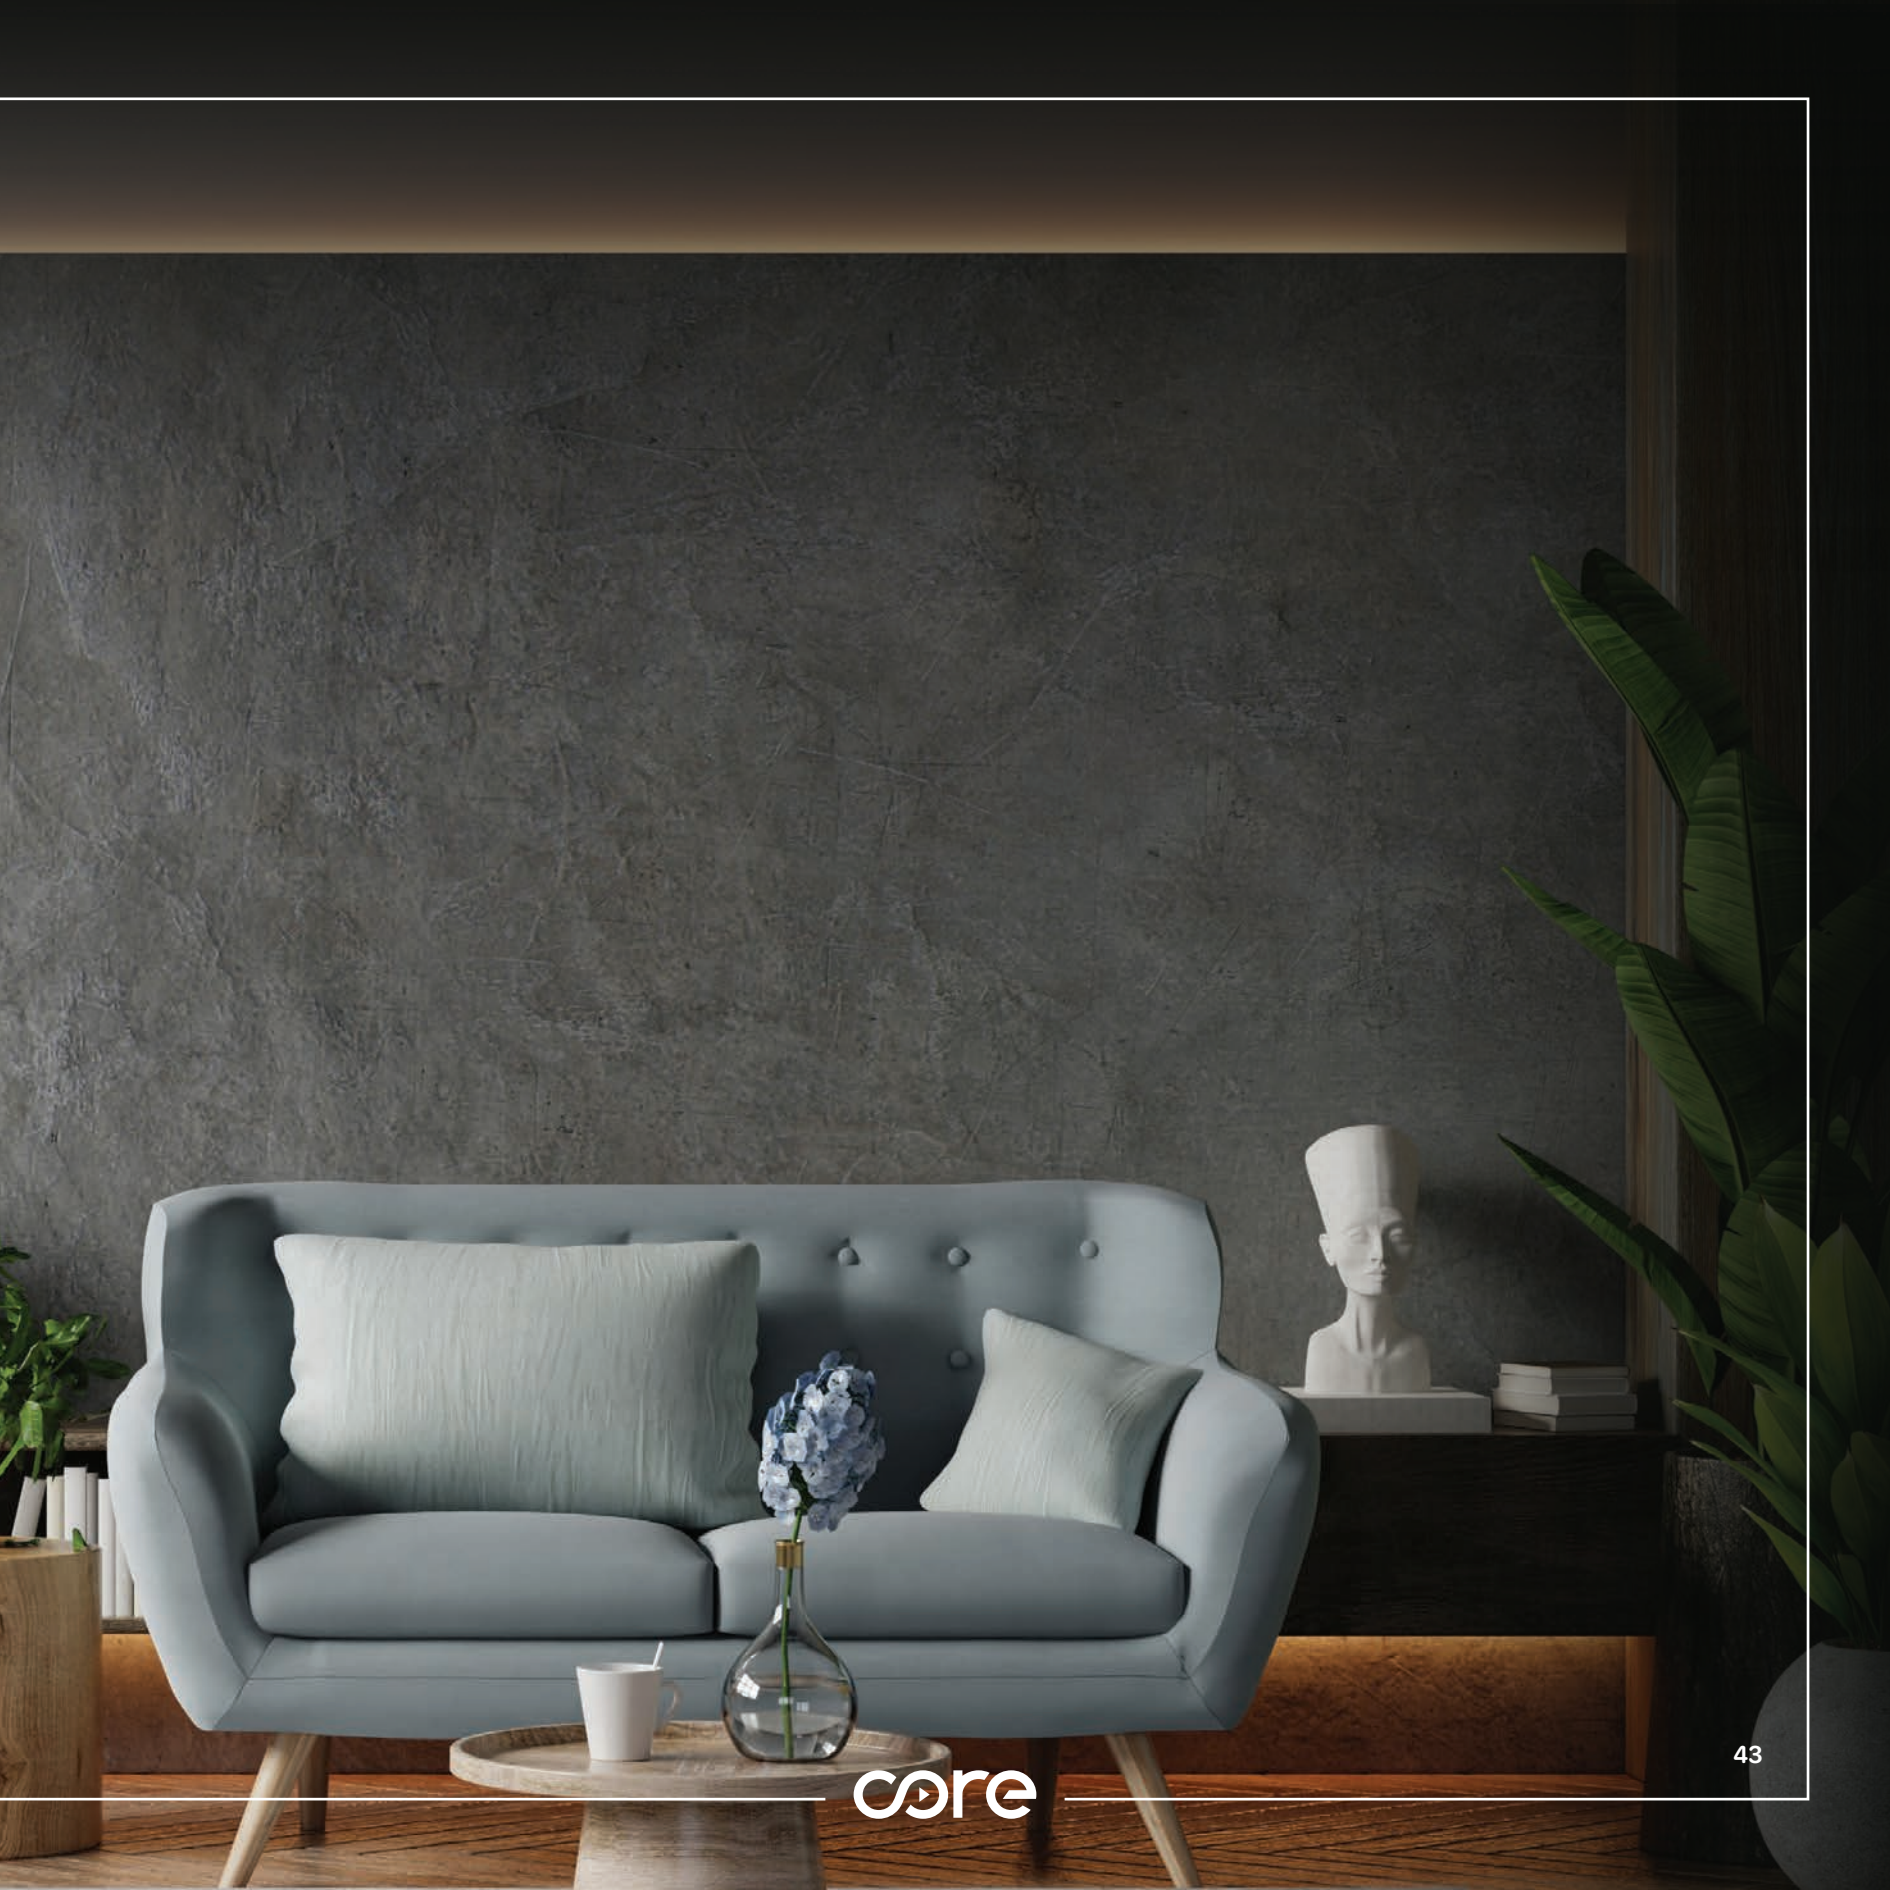

Surface Touch Panel

Slim And Robust

Surface Panel is designed to control and visualize exclusive living spaces with KNX technology. Flush-mounted slim design provides clean and neutral integration with modern interior designs.

10"

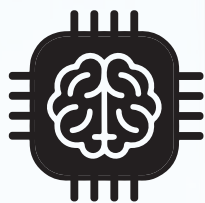

Key Features

Intercom Client

Welcome your visitors with Core Touch Panels

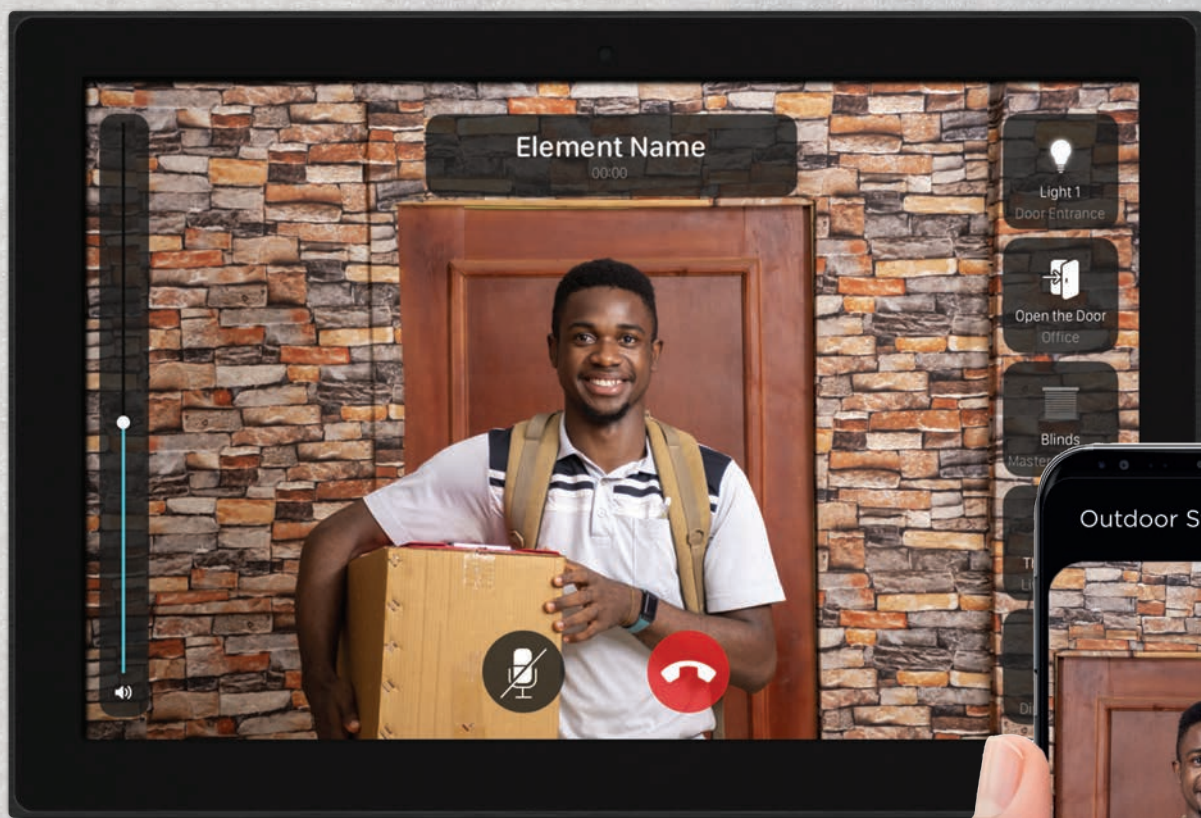

Welcome your visitors with crystal clear sound and two way video calls whether you are at home or not.

Indoor panel powered by SIP Technology

Core Touch Panels are perfect intercom indoor panels for single-family homes, villas, residences or office towers.

Using IP Technology and SIP Protocol provides robust communication, high resolution video calls and compatibility with most common Intercom door stations around the world.

Intercom Client

Robust Intercom Communication with Dual Network Interfaces

Core Touch Panels have dual network connection which provides separating home and building network in large building projects. In this way building network is reserved for intercom communication thus providing robust connection for multiple intercom calls at the same time.

Call on Mobile, Always at home, wherever you are.

With Core Mobile App don't miss your visitors or packages any more. Respond to visitors at your door immediately via Core Mobile App, whether you are at home or on the other side of the world.

Visitor will initiate call request via: SIP intercom door phone.

**Please check Call on Mobile compatible SIP door phones*

Touch panel will receive the intercom call and expect to be responded in a specified time at home.

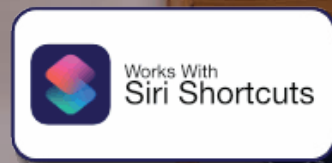

You receive a video call to your mobile app, after incoming call is not responded at your home in a specified time period.

A True Gateway to IoT World

Seamless IoT Integrations with KNX Systems

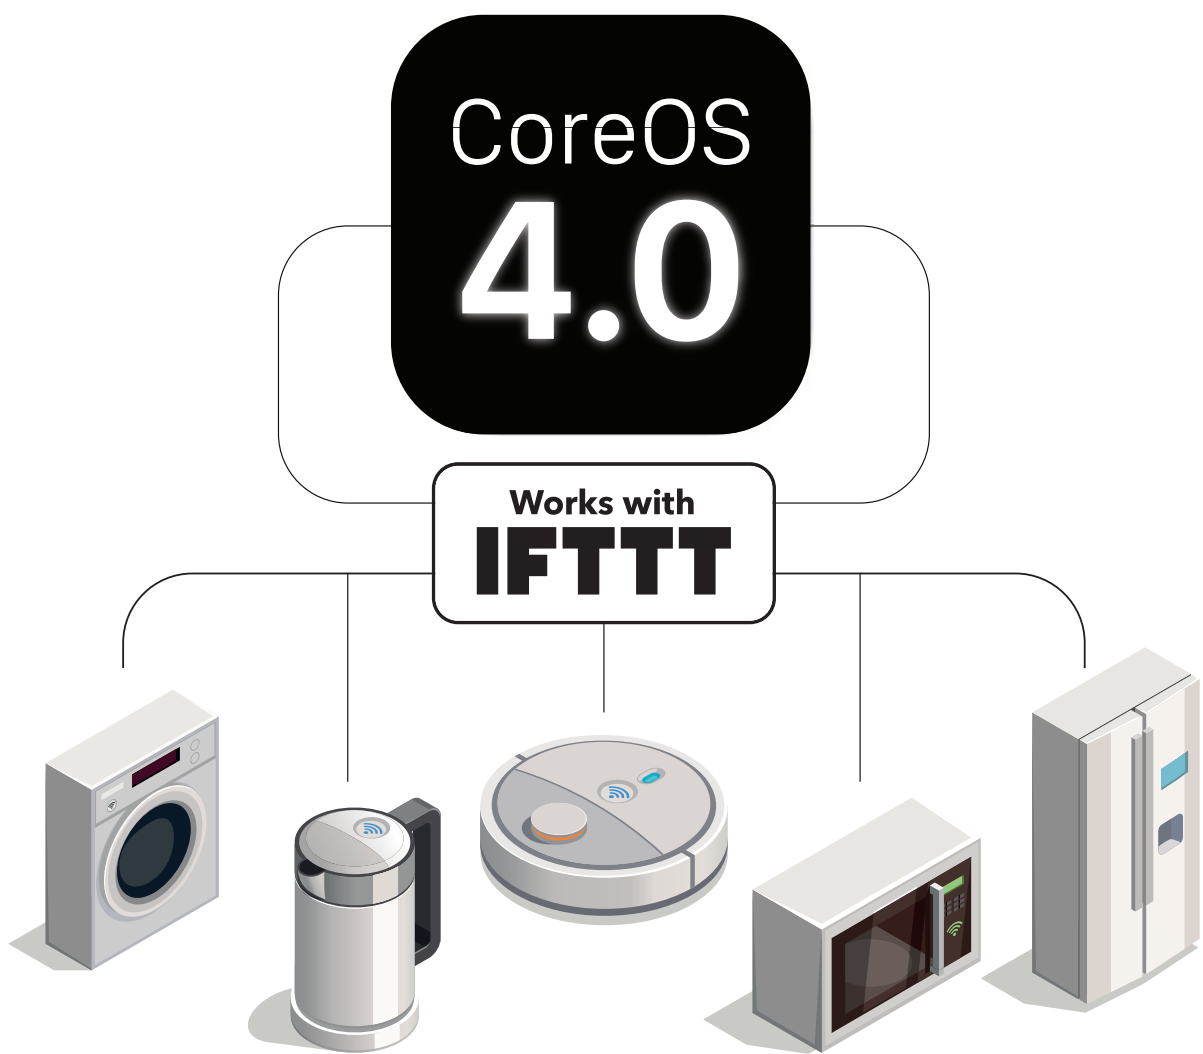

Core Touch Panels are gateways between KNX Systems and IoT world natively without need of additional hardware or software.

A True Gateway to IoT World

IFTTT Integration

Automate KNX System with IoT World by Core Touch Panels If-This-Then-That functions open a whole world of new options for running your home automatically. Using the IFTTT principle, you can even link appliances and services from IoT world.

Turn-on Hue Ambient Lights,
When chilling scene activated.

Start iRobot, When goodbye scene activated

A True Gateway to IoT World

Hey Google, Turn on Welcome Scene!

You can control Core scenes and devices with Google Assistant and Google Home Devices.

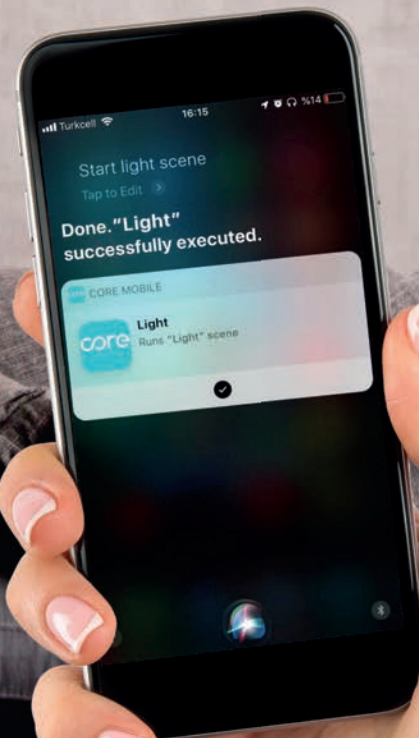

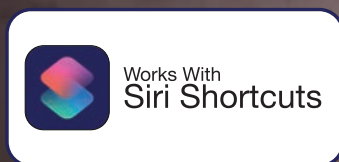

Amazon Alexa

You can control Core scenes with voice commands to
Amazon Echo Devices

Hey Siri, Turn on Lights

You can active Core Smart Home scenes with Siri
Shortcuts.

Remote Control

Meet new Core Mobile App

The Core Mobile App is completely redesigned to provide more intuitive and comfortable smart home experience anywhere in the world.

Remote Control

The Center of Your Home

Dashboard of Core Mobile App is designed visualize status of your home and control devices efficiently as soon as you turn on app.

Navigate Your Smart Devices Intuitively

Core Mobil is designed to control hundreds of devices so you can navigate devices in rooms and filter by device categories in any room easily.

Control in Detail

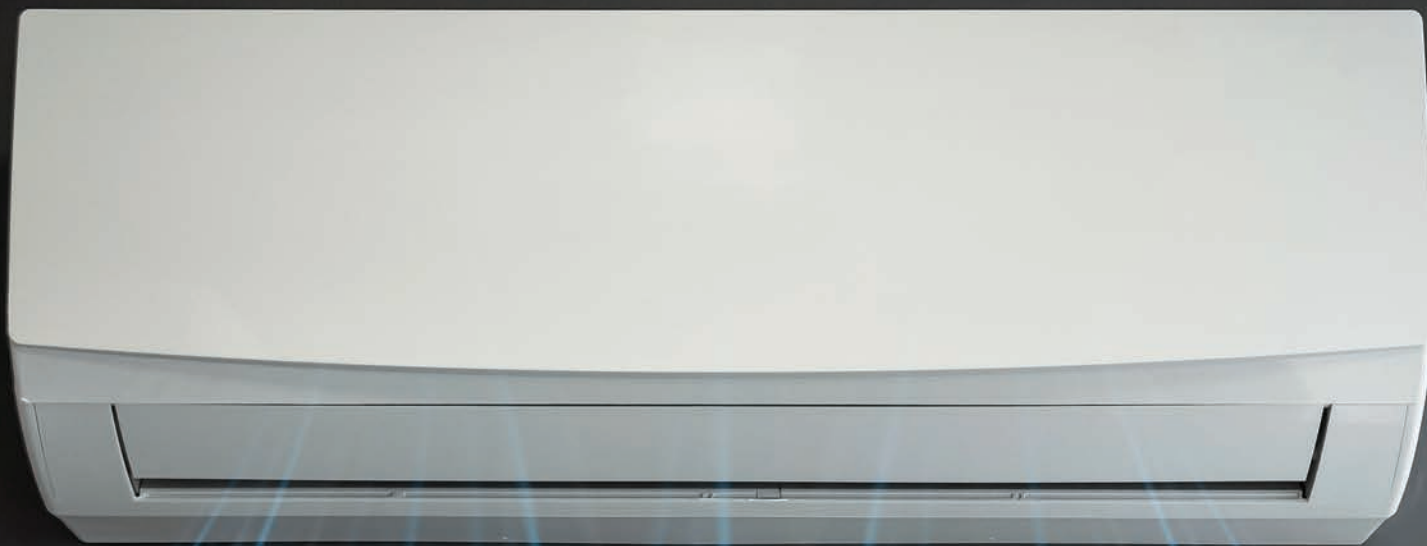

Core Mobile is designed to control all functions of devices in your home.

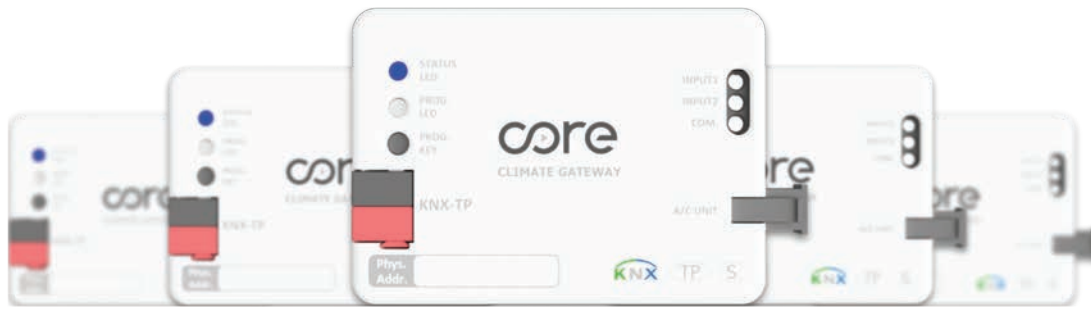

Secure Remote Connection

Thanks to advanced cloud technologies, connections between Core Mobile App and Smart Panel Controller including all passwords are encrypted. Your privacy and data are secured and your home is protected from Hackers.

Core KNX – AC Gateways

Communication between Air Conditioner indoor units and KNX Systems.

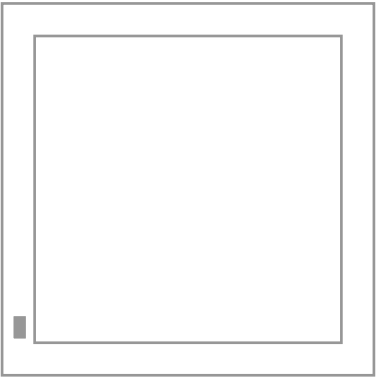

Features

- Configured by ETS standard configuration tool.
- Offering wide range of KNX DPT objects to be compatible with most of the KNX thermostats in the market.
- Total control and monitoring of all functions of the AC unit from KNX including temperature, mode, fan speed, vane and wide vane
- Smooth integration of KNX thermostats allowing the control of the AC unit by the own temperature sensor of the thermostat.
- Reporting error logs to KNX systems
- Reduced dimensions allowing a quick installation inside the Air Conditioner unit.
- Fixing metal and magnet combination providing safe and proper installation
- Industrial grade connectors providing secure connection to AC unit and preventing failure of device or AC unit due to wrong terminal connections

Technical Specifications

Eclipse Room Controller

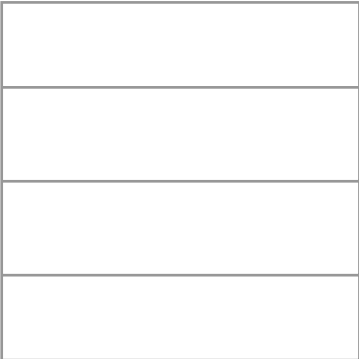

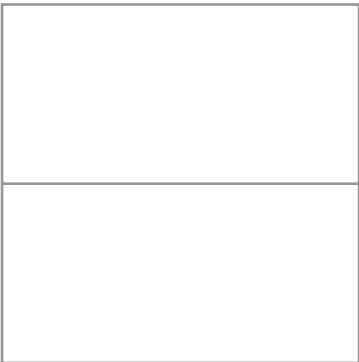

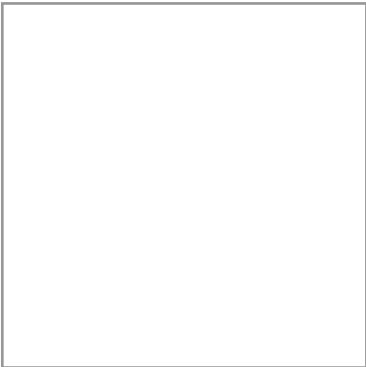

Processor:	Arm Cortex-A7 900MHz 512 MB DDR3 RAM Embedded Linux Operating System
Display:	IPS TFT 4" – 720px X 720px 400 cd/m2 HD Display
Sensors:	Temperature & Humidity CO2 Proximity & Light
Dimensions:	86mm X 86mm X 11mm
Casing Material:	Aluminum, Brass, Stainless Steel depending on the finish selection
Power:	29 VDC via KNX Auxilary Power Supply
Connectivity:	KNX-TP
